**Emergency Abatement Repair Program
Invitation & Bid No. #S7YK1220
Non-Mandatory Pre-Bid Meeting of Thursday, April 7, 2016
Questions and Answers**

Question #1

If we do not have enough money in our bank account to satisfy the requirements of section 1.9.10 of Bid S7WD0020; will a Memorandum of Understanding or a Letter of Intent between us and a third party Company/Corporation, along with their bank statements be acceptable? If not, what legal documents will be accepted?

Response:

In order to be eligible for award under this Invitation and Bid, the successful bidder Must be able to demonstrate that they can meet all of the Requirements provided in the Bidder Qualifications in Paragraphs 1.9 through 1.9.14.

Question #2

We are a plumbing contractor applying form the bid for Water, Sewer Basement Protection Plumbing Repairs our Question is regarding sending in the Bid Security; the paragraph mentions completing a registration form along with sending \$100.00 check. Where do we download the registration form?

Response:

The City of Philadelphia Annual Bid Security Program for Services, Supplies, and Equipment (SS&E) Bids (Period of Coverage: July1, 2015 – June 30, 2016) Form is attached with the invitation and Bid document.

Question #3

We are applying for both the Water/Sewer & Basement Protection Plumbing Repairs and Abatement Bids. On paragraph 1.9.10, ...submitting financial statements for last 2 years.... Is that Federal income Tax Forms? Do the City need any Bank Statements?

Response:

Bidders can submit copies of their Corporate Summary Sheets or Corporate Bank Statements as part of their Financial Statements.

Question #4

Will Abatement cover the cost for administrative fees when an erroneous notice is issued? When an erroneous notice is issued to a work order there is a lot of time, effort, money and expenses that are incurred by a business for this error. We pay permit runners, parking fees, and permit fees. A plumbing permit is only refunded at 50% for the paid amount. In order to receive a refund for a street opening or ferrule, admin needs to follow up several times with PWD until it is processed. A fair administration fee of \$200 would be proposed for these erroneous notices.

Response:

PWD Customer Field Services is currently paying up to 16 labor hours @ \$65/hr. (\$1040) for labor associated with an erroneous notice, along with the total cost of cement and permits when the street and/or footway are excavated. PWD Customer Field Services pays plumbers for the full amount of the plumbing permit whether they obtain a refund from the Department of License & Inspections or not. PWD Customer Field Services also pays the full amount for footway and street opening permits if the plumber excavates. However, if the plumber does not excavate, they are required to get a refund from the Streets Department, (Streets Department process not Water's). PWD Customer Field Services has met with several plumbers to go over the amount of labor to be paid for erroneous notices prior to the pre-bid meeting and is still considering allowing up to 20 hours which equate to 4 additional hours for a total of up to an additional \$240.

Question #5

Will the cost of \$600 for a backhoe be included in this contract for ditches deeper than 5'?

As per OSHA shoring regulations, shoring must be used for any ditches 5' or deeper. To accommodate the shoring, the ditch must be a minimum of 36" wide. A backhoe is used to transport the shoring and dig ditches and dig out the minimum width of 36". Therefore, any ditch 5' or deeper must have a backhoe included since a worker cannot dig in a hole without shoring.

Response:

PWD Customer Field Services and PWD Plumbing Repairs Unit currently allow backhoes for laterals of any depth, which encompass the larger portion of sewer-related work. The request stated is strictly for curbtraps that are located on the footway, in which a depth of 8 feet has to be achieved before a backhoe is authorized.

Nonetheless, PWD Customer Field Services and Plumbing Repairs Unit are seriously looking into assessing at a higher level and will make a determination in the near future if a higher level is warranted.

Currently, PWD Customer Field Services and Plumbing Repairs Unit allows providing a backhoe whenever the ditch/trench is 8' or deeper.

Question #6

Pricing Schedule, Attachment #2, Backhoe price:

It was established at the Pre-Bid Meeting, that the eight foot depth is a PWD arbitrary number used to pay for a backhoe. The OSHA Standard depth is five feet when shoring must be used to be in the hole. It would be unsafe to hand dig three more feet and undermine oneself. Can the PWD depth be established at five feet to pay for a backhoe to coincide with the OSHA Standard?

Response:

Reference is made to the response provided to Question #5 of this Addendum.

Question #7

Disclosure of Women as Board Members & Executives Staff:

I'm a single member Limited Liability Co. - If Vendor is an LLC the form states to attach an explanation. What type of explanation is needed?

Response:

If the bidder is a single member Limited Co., as stated above, they would provide this explanation on their Disclosure of Women as Board Members & Executives Staff Form.

Question #8

Is Vendor required to price all jobs listed on bid?

Response:

Reference is made to Paragraphs 2.9 and 2.10 of the invitation and Bid document.

Question #9

Pricing: Exactly how do I price the jobs stated on bid? Labor, parts, permits, etc.? Permit prices vary per job.

Response:

Reference is made to Paragraphs 2.3 (b) & (d.), 2.9 and 2.10 of the invitation and Bid document.

Question #10

As we understood at the meeting, if regulations are either changed, enforced, and added concerning backfill requirements and techniques there will be an adjustment made in the cost of the contract. If this were to happen then we would be notified of any changes from status quo to the enforcements and new regulations.

Response:

Yes. When the new regulations are implemented and if it requires the contractors to perform additional work or repairs that exceed what is currently being practiced or required by Philadelphia Water, then the contractor will be compensated for such additional work/labor or repairs.

For example, this would include the need to bring in fill or steel plates if necessary.

Question #11

We would like to clarify that even though it is unsafe and more difficult the backhoe cost reimbursement would remain at 8ft. depth not 5 ft. as recommended by OSHA. It is very difficult to shore a hole that you are in and dig in the hole. This would require shoveling dirt into buckets and raising them through the shoring crossbars.

Response:

The OSHA requirement attached clearly states that shoring must be used whenever a ditch/trench is 5' deep or more than 5' deep. However, it doesn't state that a backhoe must be used on such occasions.

Nonetheless, PWD Customer Field Services and Plumbing Repairs Unit are seriously looking into assessing at a higher level and will make a determination in the near future if a higher level is warranted.

Currently, PWD Customer Field Services and Plumbing Repairs Unit allows providing a backhoe whenever the ditch/trench is 8' or deeper.
