2.2.1.6 Supply all labor to mobilize the portable belt filter press equipment such as delivery, set-up, stabilize and provide electrical and mechanical connections, etc. At the conclusion of each event, the vendor shall de-mobilize the equipment by providing all labor to disconnect equipment, restore all hoses and connections and remove portable unit from the site.

2.2.1.7 Dewatered sludge shall be monitored throughout the length of the contract. The contactor shall collect the samples (four) of dewatered sludge per truckload of sludge going to the designated discharge area (see Option C) in the presence of the Water Department's designated representative. A split sample shall be made available to the contractor.

The samples shall be analyzed by the Water Department's Laboratory on a daily basis for percent solids and shall be the basis of determining the percentages of solids of dewatered sludge hauled to the designated area. The following procedure shall be used by the Water Department to handle the samples, to determine the percent solids of the sample and to generate the dry tons of dewatered sludge for each truck load. All samples received on a daily basis shall be mixed in a container by the Water Department's Laboratory. Three samples shall be taken from the one (mixed) container. Each sample shall be analyzed for percent solids. The **percent (%) Total Solid for that day** shall be the average of the percent solids of the three samples. 2.2.2 **SITE CONDITIONS**

Each digester tank will contain varying amounts of sludge. The City estimates that any of the tanks can contain between 200,000 gallons to 2,000,000 of sludge and other material that will have to be removed. The Contractor shall pump the contents of the tank to a location designated by the Plant Manager. The transfer and storage tanks are similar in size and shape to the digesters and are expected to contain similar amounts and types of material as contained in the digesters. The scope of service also applies to the transfer and storage tanks.

The successful bidder shall obtain the permission of the plant Manager prior to barricading the road during the progress of the work. The Contractor must take into account that the Plant may have special needs that will not allow the use of the plant drain system. In such cases, the Contractor must supply all additional hose, equipment labor and fuel to pump the material to the location designated by the Engineer at no additional cost to the City.

As described in Option B and Option C, the plant may also request the removal of the tank contents via a screening process or a screening/dewatering process. The screenings and/or dewatered sludge from the Southwest and Northeast plants will be disposed of at a designated area on the Southwest plant "Grit Pad" specified by the Plant Manager. Prior to disposal, all contents must be weighed for wet and dry ton billing purposes. An on-site scale facility is available for contractor use at the Southwest plant.

Appropriated reference drawings are available for inspection from the Plant Engineer. All dimensions shown on the reference drawings are approximate. The contractor is responsible for verifying all existing conditions in the field.

2.2.3 **WORK DAY**

The Contractor shall obtain prior approval for working more than 8 hours per day, Monday through Friday. The City has the right to not allow the Contractor to work on City recognized holidays. The City will inform the Contractor of upcoming City holidays as they occur during the job within a minimum of five working days in advance of the upcoming holiday. The plant manager has the right to stop the job due to plant operational problems or any other reason. There shall be no claims for the delay due to the same.

Only one digester or tank at a particular facility shall be cleaned at a time. After the complete cleaning of one digester or tank the next shall not be released for cleaning until the first one is tested, seeded and is in operation in conformance with these specifications and the satisfaction of the Plant Manager. The contractor may be asked to stop pumping or processing periodically depending on volume of material that can be handled by plant headworks as described in section 2.3.6

2.3 **SCOPE OF WORK**

2.3.1 All tanks included in this bid are considered Confined Spaces. The removal of these materials will be paid for by the City according to the price given in the line item under Option A, 2.2.1.2.

Materials that cannot be pumped by the Contractor's equipment but otherwise would not harm the City's equipment or affect the stability of the wastewater treatment process shall be manually removed from the tank by the Contractor as part of the flat rate quoted for cleaning the tank based on the two line items listed under Option A, 2.2.1.1.

The following requirements apply to materials that are manually removed by the Contractor because they cannot be pumped and are paid for as part of the Contractor's unit price bid under the line item for Option A as well as materials that are manually removed by the Contractor at the specific request of the City and paid for separately by the City via the line item under Option A. Depending on the facility and the specific circumstances, the City may require that the contractor place the materials in a City-owned dumpsters or drums in the vicinity of the tank being cleaned.

2.3.5 For the removal and reinstallation of at least one manhole cover and a maximum of four manhole covers and the removal and reinstallation of the side access plate, the Contractor is responsible for obtaining all tools or equipment including hand tools, portable hoists, forklifts, lifting straps, other lifting equipment, etc. required to open and close the manholes and side access plates at his cost. During the time that the side access cover and/or the manhole covers are open, the Contractor shall provide sturdy, OSHA-approved barricades and signage at each opening. If the City requires, the Contractor shall reclose all of the manholes at the end of each work day. The manhole to which the Contractor discharges the tank contents shall be barricaded during work and the cover reinstalled at the end of each work day. The side access opening shall continue to be barricaded during times that the Contractor is not working. The Contractor is responsible for reclosing all four of the roof manhole covers and the side access cover. The Contractor shall use new gaskets and new sealing materials when closing the access openings. Sealing materials shall be suitable for the application of sealing digester & tank access covers, shall be of at least the same quality as the existing sealing materials and fully suited for the purpose.

The gasket for the side access cover is ½" thick neoprene rubber, durometer =50. The manhole cover gaskets shall be replaced and be of the same quality as the existing gaskets. In both cases, the Contractor shall obtain the approval of the City for the new gasket prior to installation. New bolts, nuts, washers or other hardware, if needed shall be made of Type 316 Stainless Steel. The Contractor shall use anti-seize compound on all threaded fasteners prior to reinstallation. Should any holes need to be re-tapped or studs re-threaded, the Contractor shall do so at no additional cost to the City. The successful bidder shall ensure, after completion of the cleaning of internals of the digester and reinstallation of the roof manhole covers and access plate that the roof manhole covers are gas tight and the side cover is liquid tight. Any leaking seals shall be corrected by the Contractor with all leaks eliminated to the complete satisfaction of the engineer at no additional cost to the City.

2.3.6 For the Northeast plant, the total rate at which the contractor returns the slurry to the head of the plant will be monitored and shall not exceed 200 gallon per minute or approximately 1-foot of height of digester material removed per day. For instance, following plant management judgmental call and depending on the consistency of the material, a pumping scenario shall be initiated. Implementation of lead/lag pumping schedule at 4 hour intervals to reduce heavy loads to the head works. For example, the contractor may be stopped for clogging of equipment with re-circulated material. This chopped mesh material (mop heads) can be found in the screening system, grit handling units, primary and secondary holding tanks, sludge heat exchangers etc. If the contractor elects to use pump that mazzerates the product, then the plant has the option not to use the pump due to the impact of pump clogging on the plant process as described herein.

The plant will provide the contractor with sample bottles to take two (2) samples (200 ml each) per day of the material removed at time specified by the Engineer. The sample will be taken from the discharge hose before the drain to the headworks. This sample will be analyzed by PWD laboratory for Northeast plant recycle purposes. This section only applies to the method of cleaning described in section 2.1.1.1 (removal via pumping).

NOTE: There is approximately 72,000 gallons of sludge per foot of digester. The requirement for not to exceed 200 gallons per minute (GPM) pertains to the direct pumping operation only as described in section 2.1.1.

2.3.7 In regard to the Northeast plant, and specifically the screening and dewatering system, a significant delay may exist between sampling and the results of the percent solids analysis. The Water Department reserves the right to interrupt the dewatering operation based on visual analysis of the filtrate sent to the head works during sampling process (for example discharge of heavy black filtrate discovered). Any adjournment of operation based on visual analysis of a sample shall not be grounds for additional charges and/or delay damages by the Contractor.

2.4 LIGHTING

Any lighting equipment required will be supplied by the contractor. The City will permit the use of its 120 volt electrical receptacles located within the work area. The location and availability of receptacles will be determined prior to starting the project. All wires shall be protected and secured in a safe manner. If the power supplied by the above mentioned receptacles is not adequate for the lighting equipment provided by the Contractor, then the Contractor must provide any additional electrical power. Any power generator shall be approved by the City prior to use and shall be provided at no additional cost to the City.

2.5 SAFETY

2.5.1 The successful bidder is notified that all of the tanks included in these specifications are confined spaces and/or hazardous areas. Entry into and work within and around them shall be performed in accordance with all applicable Federal, State and Local laws and regulations in place during the time of the work. These tanks contain anaerobic sludge, which produces methane and other gases. As such, the contractor must exercise appropriate caution with sources of ignition as well as provide for ventilation and safety of personnel.

2.7 SCHEDULE

2.7.1 After the issuance of the purchase order and upon request by the Engineer, the Contractor shall submit a plan and schedule a meeting with the Plant Manager and finalize the plan to clean the tank. Only one tank shall be available to the Contractor at a given time. The contractor is to check in with designated plant operations personnel at the beginning and end of each pumping day for the purpose of monitoring progress.

2.7.2 The process of cleaning the tank requires that the Contractor supply a pump with all necessary hoses, couplings, safety barricades, etc. The contractor is to supply a flow meter on the discharge line of the pump to determine the volume removed from the tank.

The Contractor shall also supply the calibration record for the flow meter used to certify that it has been calibrated within six (6) months prior to the start of pumping. The City has the right to stop completely or order the decrease of the rate of pumping or stop the process of cleaning due to operational difficulties, equipment failure or for any reason whatsoever for any length of time. The Contractor shall obtain prior approval for working more than eight (8) hours per day, Monday through Friday.

2.7.4 When cleaning storage tanks or transfer tanks the time between the restoration of the first tank to normal service and the release of the second tank for cleaning, shall require a waiting period of at least 2 weeks.

2.7.5 The above shall be valid for each subsequent digester or tank depending on the item being cleaned at a particular facility.

2.8 **DESCRIPTION OF FACILITIES**

2.8.1 **DIMENSIONS**

Each digester is 110 ft. in diameter, 44 ft. high (including a 5½ ft cone bottom) and has a normal operating depth of 33 feet of liquid. The roof (cover) is fixed approximately 39 ft. above the bottom of the sidewall. Below the digester wall, the floor slopes to a cone 5.5 ft. deep. Access to the interior is made through (4) four 36 inch diameter manholes in the cover, and through a 5 ft. wide, 4 ft. tall access cover in the side. The digester dimensions and elevations of the side access cover above the cone is not the same for all digesters. The storage and transfer tanks are of similar overall size and dimensions compared to the digesters. Actual dimensions of the tanks can be obtained from the Plant Engineer. The Southwest sludge storage tanks are open and must be accessed from the top.

2.8.2 **FLUSHING WATER**

The contractor is allowed to use water from the plant water hydrants. The water is chlorinated, non-potable plant effluent. Flushing water is available at each digester and nearby the other tanks from a fire hydrant with Standard PWD Fire Department threads. Additional water may be obtained by pumping from the final tank's effluent, which is non-chlorinated water. This pumping will be the responsibility of the contractor. Boosting (if necessary) of water pressure from the hydrants will also be the responsibility of the Contractor. If water is not available, available only at reduced pressure then the contractor must inform the Plant Engineer. The plant does require flow monitoring to determine the volume being recycled from the digester cleaning to the head of the plant. The Contractor is to supply a flow meter on the discharge line of flushing water into the digester. The Contractor shall also supply the calibration record for the flow meter used to certify that it has been calibrated within six (6) months prior to the start of pumping.

2.8.3 **ACCESS**

The Access to the interior of the digester is gained through an access plate on the wall of the digester. The four manholes on the roof are to be used for ventilation. Opening and reclosing the access plates and manholes with new gaskets that are compatible with an anaerobic sludge and gases is the Contractor's responsibility.

If any stud, nut or bolt is damaged or found to be damaged during opening or closing, the same shall be replaced at no additional cost to the City as described in further detail in this specification. This precludes any pre-existing damage to the studs, nuts, or bolts. When the sludge level inside the digester prevents access through the wall access plate at ground level, the Contractor will be required to clean the digester by accessing the digester through the roof man-holes.

2.8.4 **CONTENTS**

The tanks may contain Anaerobically Digested Sludge, Rags, Trash, Grit and/or other debris. It is the Contractor's responsibility to clean everything to the bare concrete floor and walls.

2.8.5 **CONFINED SPACE**

All of the tanks covered by this specification are classified as Confined Spaces; therefore all necessary precautions must be taken during the job in progress. Contractors will be required to obtain a permit from the City and adhere to all applicable rules, regulations, laws and standard industry practices pertaining to the Confined Space entry.

2.8.6 **SPILL CONTAINMENT**

Prior to the start of work, the Contractor shall meet at the site to become familiar with the details of that site as it relates to his operations. All precautions must be taken to eliminate the possibility of any leak or spill of the material on the grass and the roads. Spill control materials such as absorbent socks, plastic sheeting, etc. shall be in the Contractor's possession and on site prior to and throughout the performance of the work. Contractors will not be allowed to hose or wash the spill on the road, because it could be carried into the creek. During the progress of the job and after completion the site shall be kept clean of trash. Used or spent spill control materials less than 2 cubic yards in volume per tank cleaned may be disposed at the project site in allocation designated by the engineer at no cost to the Contractor. Larger volumes of used or spent spill control materials shall be removed and properly disposed of by the Contractor at his expense.

2.8.7 **POWER**

Contractors are allowed to use power for lighting and other small needs from a designated source as stated above at no charge.

It is the sole responsibility of the bidder to ensure that the bidder has received any and all addenda and the Procurement Commissioner may in his/her sole discretion reject any bid for which all addenda have not been executed and returned in accordance with the instructions provided therein. No bid may be considered if received after the date and time for the opening of bids established by the Invitation and Bid, nor may any bid be modified after that date and time. The time of bid opening shall be the time displayed on the City's official bid clock located at the bid room. In the event of any discrepancy between actual time and the City's official bid clock, the latter shall determine the time of bid opening. Notwithstanding the foregoing, the Procurement Commissioner reserves the right to accept a late bid if it is the only response and it is in the best interest of the City to do so.

2. BID SECURITY.

In order to be eligible to bid, all bidders must be enrolled in the City's Annual Bid Security Program. All bidders must complete the registration form and pay a non-refundable Annual Bid Security Program fee of \$100.00, payable annually to the order of "The City of Philadelphia". Enrollment and payment of the Annual Bid Security Program fee must be completed prior to bid opening to be eligible for award. If applicable, an individual bid bond may also be required in the Invitation and Bid. Notwithstanding bidder's enrollment in the Annual Bid Security Program, an awarded bidder who fails to execute its contract will be subject to the City's remedies set forth in Paragraph 17.

3. BID PROCESSING FEE.

Cash is not acceptable.

4. SPECIFICATIONS.

When a specification is issued in connection with the Invitation and Bid, no deviation will be permitted, except if/as indicated in the Invitation and Bid and the bidder will be required to furnish articles and/or services in conformity with that specification. When catalogues, model numbers, trade names, or cuts are listed in the Invitation and Bid, they are, unless otherwise specified, included for the purposes of furnishing bidders with reference information concerning the style, type or kind of article and /or service desired. A bidder may offer an article, service and/or equipment, which he/she certifies to be equal or better in quality, performance and other essential characteristics. If submitting an alternate, the

bidder must specify the alternate (e.g., make and model #) in the bid and submit with the bid a complete description of the article (including any technical supporting documentation) and/or service proposed to be furnished. Failure to do so will require the bidder to furnish the article and/or service specified in the Invitation and Bid. The Procurement Commissioner reserves the sole right to determine whether alternates offered are equal or better.

Unless otherwise provided in the bid specifications, all items offered by the bidder must be new. A "new" item is one which will be used first by the City. This clause shall not be construed to prohibit bidders from offering goods, supplies, equipment, or materials containing recycled materials or printing with recycled content; bidders intending to provide goods made with recycled materials should notify the Procurement Department.

Any and all specifications issued in connection with the Invitation and Bid are deemed incorporated into and become part of the Contract.

5. PATENTS.

The successful bidder (also referred to throughout these Terms and Conditions of Bidding and Contract as the "awarded bidder" or "Contractor") shall be solely responsible for all royalties and charges that may be due to any patent holder for or on account of the use of any patented appliance, product or processes. Evidence of such payment shall be submitted upon request of the Procurement Commissioner and failure to submit such evidence may, in the sole discretion of the Procurement Commissioner, result in rejection of the bid or constitute an event of default, entitling the City to all rights and remedies as provided herein in Paragraph 19 Default and Termination.

Any bid which is incomplete, obscure, conditional, or unbalanced, which contains additions not called for, or irregularities of any kind, including alterations or erasures, or which fails to conform in any respect to these Terms and Conditions of Bidding and Contract and the specifications and requirements included in the Invitation and Bid is non-responsive and shall be rejected, except where the Procurement Commissioner, in his/her sole discretion, determines that the non-responsiveness is not material or that a waiver of the non-responsiveness is otherwise permitted by the Invitation and Bid by these Terms and Conditions of Bidding and Contract or by law. The Procurement Department's determination of non-responsiveness shall be final and any bid rejected as non-responsive shall not be eligible for award of the Contract.

9. RESPONSIBILITY.

Unless otherwise specified, after bids are opened, the Procurement Department, and other City departments or agencies where appropriate or specified, shall review and may investigate the responsibility including, but not limited to, the integrity, qualifications, references, capacity and ability to perform the Contract resulting from the Invitation and Bid in accordance with its terms of the lowest responsive bidder. All determinations of bidder responsibility shall be vested in the sole discretion of the Procurement Commissioner and other City officials. Any bidder who is deemed not responsible shall be ineligible for award of the Contract.

Bidders deemed not responsible will be notified of such determination and the reasons therefore in writing by the Procurement Department, and shall have the right to contest the determination by submitting to the Procurement Department, within forty-eight (48) hours after receipt of its written determination, a written request for reconsideration that includes information relating to the bidder's qualifications and responsibility and demonstrating the insufficiency of the reasons stated in the written determination finding the bidder not responsible. Any further determination of a contesting bidder's responsibility shall be vested in the sound discretion of the Procurement Commissioner and other City officials.

All bids are valid for a period of not less than 60 days, or as otherwise specified in the Invitation and Bid. If the bid has not been awarded within the specified period of time, the bid shall be valid for subsequent award only upon the express consent of the bidder, with no change to the submitted bid. Any price increases/decreases expressly provided for in the Invitation and Bid will be allowed. All Contract awards shall be made by the Procurement Department upon written notice to the bidder that is determined by the Procurement Department to be the lowest responsive and responsible bidder. When applicable, unit pricing quoted will prevail in the event of any discrepancy(ies) between unit price and the extended amount. This same quoted unit price will be the determining factor in establishing applicable contract amount(s) and award(s).

11. QUANTITIES AWARDED.

For requirements contracts only, the articles and quantities of such articles as set forth in the Invitation and Bid are estimates and the Procurement Commissioner, in his/her sole discretion, may make an award for none or all or some of the articles bid and in such quantities as the Procurement Commissioner shall deem appropriate. Any purported assignment in violation of this provision shall be of no effect.

19. DEFAULT and TERMINATION.

All work performed and goods and services rendered by a successful bidder (referred to in this Section as "Contractor") under any Contract resulting from the Invitation and Bid shall strictly conform to these Terms and Conditions of Bidding and Contract and the specifications and requirements contained in the Invitation and Bid.

The Procurement Commissioner may, in his/her sole discretion, require Contractor to continue to furnish all goods and perform all services required under the Contract until the Termination Date, in which case, subject to the remedies enumerated above, the successful bidder shall be paid in accordance with the Contract therefore. If the City requires Contractor to cure the event(s) of default, or to continue to furnish goods or services until the Termination Date, and Contractor refuses or fails to do so, then such failure shall itself be deemed an event of default under this Section, for which the City may exercise any of its rights hereunder.

In addition to any other rights or remedies available to the City at law or in equity,

Contractor acknowledges that any breach or failure to conform to this certification may, at the option of the City, result in the withholding of payments otherwise due to Contractor and, if such breach or failure is not resolved to the City's satisfaction within a reasonable time frame specified by the City in writing, may result in the offset of any such indebtedness against said payments and/or the termination of this Contract for default (in which case Contractor shall be liable for all costs, losses and other damages resulting from the termination).

- b. Subcontractor's Certification of Non-Indebtedness - Contractor shall require all subcontractors performing work in connection with this Contract ("subcontractor" shall also include suppliers providing goods or materials) to be bound by the following provision, and Contractor shall cooperate fully with the City in exercising the rights and remedies described below or otherwise available at law or in equity:

In addition to any other rights or remedies available at law or in equity, subcontractor acknowledges that any breach of or failure to conform to this certification may, at the option of the City, result in the withholding of payments otherwise due to subcontractor for services rendered in connection with the Contract and, if such breach or failure is not resolved to the City's satisfaction within a reasonable time frame specified by the City in writing, may result in the offset of any such indebtedness against said payments otherwise due to subcontractor and/or the termination of subcontractor for default (in which case subcontractor shall be liable for all costs, losses and other damages resulting from the termination)."

- b. In accordance with Chapter 17-400 of The Philadelphia Code, Contractor agrees that its payment or reimbursement of membership fees or other expenses associated with participation by its employees in an exclusionary private organization, insofar as such participation confers an employment advantage or constitutes or results in discrimination with regard to hiring, tenure of employment, promotions, terms, privileges or conditions of employment, on the basis of race, color, sex, sexual orientation, gender identity, religion, national origin or ancestry, shall constitute an event of default under this Contract and shall entitle the City to all rights and remedies as provided herein in Section 19 or otherwise available to the City at law or in equity.
